The page is divided into sections: 'Article Info' (Publish Date: 20 Feb 2020) and 'Abstract' (Measuring instrument becomes very important to be able to know how much human weight is. Weight information is generally obtained from measurements by body scale. One of other methods to find out a person's weight is by image processing. This study aims to calculate body weight by image processing with the Artificial Neural Network algorithm using back propagation method to detect body weight. The results of testing, analysis, and system accuracy of 97% indicate that the method of calculating body weight is very possible through image processing with various provisions and restrictions. Key words: Weight, Computer Vision, Artificial Neural Network). The footer includes 'Copyrights © 2020'. On the right side, there are two panels: 'Citation Download' with options for RIS (EndNote, Reference Manager, ProCite) and BibTex (Latex, Jabref); and 'Original Source' with options for Download Original and Google Scholar (Check in Google Scholar). Below these is a 'Journal Info' panel with the journal title, website link, abbreviations (JTI), publisher (IAES Indonesia Section and Partners), and subject (Computer Science & IT).
